Career Objective

Full-stack developer and MCA student (Expected 2027) skilled in Node.js, React, MongoDB, and Python, with hands-on experience building RESTful APIs and AI-integrated web applications. Focused on secure, maintainable code and a good user experience.

Education

MCA, Chandigarh University — CGPA: 7.93 | 2025–Expected 2027
BCA, Purnea University — 76% | 2021–2024
Class XII (BSEB), +2 High School, BMP-7 Katihar — 76.6% | 2019–2021
Class X (BSEB), High School, BMP-7 Katihar — 75.8% | 2018–2019

Projects

AI Personal Health Intelligence Platform (LifeLedger) — July 2026 – Present
React.js, TypeScript, Node.js, Express.js, MongoDB, JWT, Redis, Cloudinary, AI APIs

- Built a centralized digital health vault that unifies medical records, appointments, and prescriptions into one secure data model, solving fragmented patient data.
- Built a JWT + RBAC middleware layer for patient, doctor, and admin roles, enforcing permissions centrally across 25+ API endpoints with shared validation and error handling.
- Integrated LLM-based summarization and symptom guidance into the document pipeline, reducing manual effort in reviewing lengthy medical reports.
- Modeled patient-doctor-appointment-prescription relationships across 10+ MongoDB collections with indexed queries for faster health timeline retrieval.
- Cut redundant database calls and notification lag using Redis caching and Socket.io for real-time appointment and health alerts.

Personal Finance Tracker — Oct 2025 – Dec 2025
Python, Flask, MySQL, Bootstrap, jQuery, Chart.js

- Owned end-to-end development of a full-stack finance app to track expenses, manage budgets, and monitor spending habits.
- Designed interactive dashboards with Bootstrap, jQuery, and Chart.js showing weekly and monthly trends, remaining budget balances, and spending insights in real time.
- Implemented secure user authentication and session management in Flask for data privacy and personalized tracking.
- Used MySQL for optimized storage and retrieval of transaction history, budget records, and financial data.

Essential Skills

- **Languages:** JavaScript, Python, Java, C++, SQL
- **Frontend:** React.js, HTML, CSS, Bootstrap, jQuery
- **Backend:** Node.js, Express.js, Flask, REST API design & development, JWT
- **Databases & Caching:** MongoDB, MySQL, Redis
- **Core Concepts:** DSA, OOPs, DBMS, HTTP/APIs, OS
- **Tools & Practice:** Git, GitHub, Postman, Cloudinary, AI/LLM APIs
- **Professional Skills:** Ownership Mindset, Self-Motivated Learning, Problem Solving, Team Collaboration

Achievements

- **Secured 14th rank** among 100+ teams in CipherHunt through strong collaboration, problem-solving, and quick decision-making.
- Solved **190+ DSA problems** across LeetCode and competitive programming platforms.

Certifications

- Introduction to Data Science
- Introduction to AI & Deep Learning
- Introduction to Prompt Engineering
- Introduction to NLP
- Robotic Process Automation
- Introduction to Generative AI
